

PRESS RELEASE

For Immediate Release

Surf and Sand Safaris is excited to launch its exciting new beach tours product and website for Great Beach Drive 4WD Tours.

www.gbd4wdtours.com

A trip to Queensland's Sunshine Coast is not complete without escaping the bitumen and indulging in a unique once in a lifetime 4WD tour experiencing the Great Beach Drive and Australia's Nature Coast.

A division of Surf & Sand Safaris, Great Beach Drive 4WD Tours is the only dedicated Noosa to Rainbow Beach tour operator, and offers one-day, overnight and private tours.

The tours travel more than 70km along iconic beaches, and the vehicles drive right on the sand, so guests can soak in the scenery and wildlife, such as dolphins, manta rays, turtles, soldier crabs, birdlife, and whales (whale season is June-October).

There are regular stops along the tour, and with no fixed schedule, guests have the freedom to explore this unique and stunning coastal stretch of Queensland.

Stops include the red and yellow sands of Red Canyon, 360-degree views at Double Island Point Lighthouse, a refreshing swim at Honeymoon Bay, and a traditional demonstration of the coloured sands at Rainbow Beach illustrating how the Gubbi Gubbi people used the sands for artwork and decorating boomerangs.

Surf and Sand Safaris Managing Director, Glenn Wiggins, and his team have worked to create this remarkable tour and experience for visitors to the Sunshine Coast region.

"We are delighted to expand our tours across the beautiful Sunshine Coast and be able to showcase an iconic Australian experience," he said.

“Locals have been enjoying this drive for years. Driving on the sand past rainforest, two biospheres, and along some of Australia's most dramatic and scenic coastlines.”

Glenn and his team also planned the tour to be accessible for everyone with packages for families, small groups up to 36 passengers, and private tours. The modern fleet of air-conditioned 4WD wagons and 11-seater 4WD mini-buses also cater for those who are mobile impaired, as well as children as young as 6 months.
